Professional Profile

Software Engineering student with hands-on experience leading the complete lifecycle of digital platforms — from requirements gathering to deployment. I build clean, accessible, and responsive interfaces, bridging stakeholder needs with robust technical solutions and iterating rapidly based on feedback.

Skills

Angular • TypeScript • JavaScript • HTML5 • CSS3 • Responsive Design • Accessibility (A11y) • WordPress • Figma • Git/GitHub • Requirements Analysis • UX/UI Design • OOP • Python • Java • C# • C++ • SQL

Work Experience

Frontend Intern — Office of Academic Affairs, Escuela Politécnica Nacional (EPN) *Quito, Ecuador*

Aug. 2025 – Jan. 2026 · 6 months · Hybrid

- Led the full development lifecycle of a digital platform designed to bridge the academic and business sectors, serving as the primary technical liaison between stakeholders and the development team.
- **Requirements Analysis:** Translated strategic stakeholder needs into detailed technical specifications for software development, documenting acceptance criteria and use cases.
- **UX/UI Design:** Designed an intuitive, user-centered interface in Figma ensuring smooth navigation for both companies and students; translated wireframes into accessible interfaces (semantic HTML, contrast ratios, visual hierarchy).
- **Technical Implementation:** Built Angular components (templates, styles, responsive layouts) aligned with the institutional design system; led end-to-end WordPress development ensuring a scalable and maintainable architecture.
- **Business Logic Integration:** Ensured every functional requirement was correctly implemented in the final solution, optimizing the connection between the academic and business sectors.
- Managed version control with Git/GitHub across all project phases.

Software Developer — Academic Projects (Escuela Politécnica Nacional) *Quito, Ecuador*
Apr. 2020 – Present

- Led multiple student teams to deliver academic projects, resulting in the prototypes listed under “Featured Projects.”

Featured Projects

- **Clinical Laboratory System (Academic Prototype)**
Interface for test registration and result reporting
 - Accessible forms with validations and clear information hierarchy.
 - Strong focus on usability for data entry and reporting views.
- **“Chauchera” Web App (Academic Prototype)**
Lightweight personal expense tracker
 - Clean interface for quick balance and category overviews.
- **Cryptocurrency Wallet (Academic Prototype)**
Balances and transactions interface
 - Simple, readable dashboard with empty states and status views.

Education

Software Engineering (In Progress) Escuela Politécnica Nacional, Quito	<i>2021 – Present</i>
High School Diploma in Sciences “Pomasqui” Educational Institution	<i>2021</i>

Certifications

- Introduction to Data Analysis with Python – Alison (2023)

Languages

Spanish: Native	English: Intermediate (B1)
------------------------	-----------------------------------
